

RG RhinoGuard™

BETTER NASAL INTUBATION

The first and only nasal endotracheal tube introducer/dilator.

The RhinoGuard advantage, when used properly:

- Decreased incidence of bleeding
- Gradual dilation of nasal passage tissues
- Increased ability to use desired size endotracheal tube
- Decreased incidence of adenoid tissue avulsion
- Decreased incidence of nasopharyngeal tunneling or dissection
- Quicker intubation time
- Duplication of intubation experience
- Is not made from material that contains DEHP or latex
- Available in two sizes for a customized fit for all endotracheal tube sizes 3.0 - 8.0 and optimized to length for ease of use
- Made in the USA
